(512)-210-6021 | kamalkiranpolisetty@gmail.com | www.linkedin.com/in/kamalkiranpolisetty

EDUCATION

Master's in Computer Science

Texas State University, San Marcos, Texas

Bachelor of Technology in Computer Science

Presidency University, Bangalore, India

August 2023-May 2025

GPA: 3.75/4.0

August 2018-May 2022

GPA: 8.80/10

EXPERIENCE

Software Engineer Intern

August 2025-Present

KonfigAI, Charlotte, USA

- Led backend development for Java Spring Boot microservices, contributing to Spring Boot 4 migration, Gradle upgrades, and dependency alignment across 9 services.
- Optimized MongoDB-backed REST APIs by resolving complex aggregation and projection issues, improving query efficiency, and reducing runtime errors.
- Improved application startup time and runtime performance using lazy initialization, Spring Context Indexer, Jackson Blackbird, JDK 21 JVM tuning, and connection optimization, achieving ~15–20% faster startup times.
- Resolved production-critical issues and security findings, addressing DAST and SAST vulnerabilities, PDF generation failures, XML parsing errors, and data formatting defects to strengthen system stability and security.

Associate Software Engineer

June 2022-July 2023

Capgemini, Bangalore, India

- Developed and maintained backend services using Java, Spring Boot, and Hibernate, implementing JWT authentication and role-based authorization to secure APIs.
- Built and maintained React components for dashboards, forms, and real-time data views, integrated APIs seamlessly, and enhanced frontend responsiveness and user experience through optimized state management and component reuse.
- Optimized API and application performance by implementing caching strategies, query optimization, and database indexing, reducing average response times by 35% and improving system reliability under high load conditions.
- Collaborated with frontend teams, managed CI/CD pipelines using Git, Maven, and Docker, and contributed to Agile sprints, reducing integration bugs by 25% and accelerating delivery cycles.

Software Intern

February 2022-April 2022

Capgemini, Bangalore, India

- Developed Java-based integration solutions using MuleSoft framework to connect enterprise databases and file systems, reducing manual data processing by 60%.
- Developed and implemented optimized database schemas, tables, and stored procedures that enhanced database performance, resulting in a reduction of query execution time by 15%.
- Created interactive dashboards using React, increasing HR operational efficiency by 35% and enabling real-time monitoring of key metrics including payroll, tax deductions, and employee performance.

Web Development Intern

July 2021-September 2021

Cureya, Bangalore, India

- Developed interactive components for healthcare platform using React, implementing state management and hooks to create responsive patient dashboards and appointment scheduling interfaces.
- Engineered Java-based backend services for user authentication and data management, ensuring secure connections between React frontend and healthcare databases.
- Optimized application performance by implementing efficient React rendering patterns and service optimizations, resulting in 20% faster page load times and improved user experience metrics.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML/CSS

Frameworks: Spring Boot, Spring MVC, Hibernate, JUnit, Node.js, Angular, React, React Native, MuleSoft

Developer Tools: Git, Docker, Jenkins, Terraform, Maven, Gradle, Postman

Cloud: AWS (EC2, S3, Lambda, Gateway API, Route 53), Google Cloud

Databases: MySQL, PostgreSQL, MongoDB, AWS- RDS, Redis

Concepts: REST APIs, JWT, OAuth2, Microservices, CI/CD, Agile/Scrum, OOP

PROJECTS

TrailLink

Texas State University

- Engineered a cross-platform mobile application for trekking enthusiasts, featuring real-time location sharing, SOS alerts, and interactive route mapping, reducing planning time by 60%.
- Developed secure authentication with JWT/bcrypt, implemented RESTful endpoints and WebSocket for real-time chat and location updates, supporting 100+ concurrent users with minimal latency.
- Integrated third-party APIs, including Open-Meteo for geocoding and weather forecasts, achieving 98.5% location accuracy and enhancing trekker safety.
- Designed and developed the full stack of the application using React Native, Node.js, and MongoDB, ensuring an intuitive UI that earned an 84% System Usability Scale score from user testing.
